Better Than YouTube Video Site

Better Than YouTube Video Site

Have you lost your mind? What can be **better than YouTube video site**? YouTube has billions of people flocking to it and for good reason but what can be better?

I hope you stick around to find out why I say that, I know you will be glad you did. You see there is a *video websites better than YouTube*. Well it's not a video site as you know it but it's where you can add videos. The one fundamental truth about watching videos in YouTube, as entertaining as they are, it doesn't PAY you!

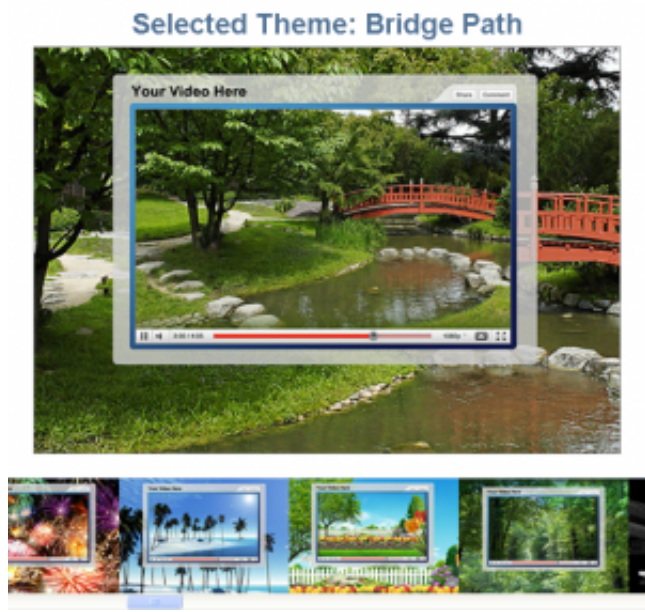

Have you heard of [Staged](#)? If you haven't, you soon will! They've created a program where you can add any YouTube video put it on a stage, which make them look 10 times better than YouTube video site, surrounded them with your ads and you get paid instead of YouTube. It's totally awesome! It's really to bad I didn't come up with this idea myself. :(

Finally An Easy Way To Make Money FAST!

I've been on the internet a very long time and one thing I've learned is don't reinvent the wheel. When you see a business model that works, do what they do! This time instead of coming up with your own video hosting site, you will be able to direct all that traffic to your money sites or any affiliate programs for free!

Here is how it works - Let's say you have your own product/service or an affiliate link you want to promote but you need traffic. All you have to do is go to YouTube.com, do a search for a video related to your product or service. Usually the most viewed videos come up first, those are the ones you want, grab the URL of the video and add it to any of the 46 stages provided, add a description, *copy their tags* and add them to your stage and click submit and your done.

[/caption]

What you are able to do next is what makes [Staged](#) so powerful and better than YouTube video site. Inside [Staged](#) there is an ad manager where you are able to add your ads, group them and rotate them. They give you three ad sections where your ads will appear. The top, the sidebar and below the video. After you submit your stage to social network sites (and you don't need all of them for this to work), people are captivated by your stage because it's so different, they'll want to share it with their friends and their friends, before you know it, you are getting lots of traffic to your stage and people are clicking on your ads.

If It Works For YouTube, It Will Work For YOU

Think about it, do you think YouTube would place ads around and inside videos if it didn't work? Of course not, it WORKS!

The only thing you have to make sure is get people in front of your staged videos. Some will say that is better said than done, but remember, you are NOT selling anything. All you are doing is sharing videos. Who doesn't like funny, humorous, or even a teaching video? There is never any mention of "click my ads so I make money"! People want information or want to be entertained and now you can give them what they want not only with videos that are getting lots of views but with your own stage as well.

It amazes me what people come up with. This program is absolutely amazing, I can really see the potential it has and there are lots of testimonials to back up what I am saying right here, but you have to see it for yourself. Go now and check out this new program that is, in my opinion, better than YouTube video site.
